TECHNICAL CHARACTERISTICS:

- Microprocessor controller with LCD screen.
- Inverter-modulated air flow according to required output.
- Self-adjusting Dew Point control for process optimisation.
- PID electronic process temperature control
- Daily/Weekly scheduler.
- Regeneration temperature control according to the required dew point.
- Material anti-stress function.
- Modular system.
- Standard/Custom materials database.
- ModBus RTU/TCP interface.

ACCESSORIES:

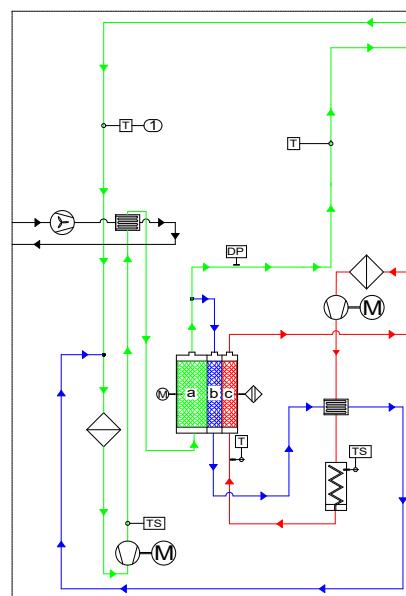

- Dew point meter.
- 7" Colour touch screen

The DW Series desiccant dryers with rotor technology offer high performance levels in the drying field and maximum efficiency and operating versatility.

The DW models maintain a constant Dew Point value of between -25°C and -50°C, with flow rates from 40 to 250 m³/h.

The process temperature can be set to up to 150°C in each hopper.

Available pairing with a wide range of hoppers with capacities of 50 to 600 l.

ADDED VALUE:

• ENERGY EFFICIENCY

Energy consumption represents the main cost during the life cycle of a machine, so the right choice makes for a quick return on the investment and a higher margin on the finished product. The most innovative desiccant dehumidification technology: energy saving and environmental protection.

• OPTIMISATION

Easy programming with only two parameters: type of material (selectable from the database) and hourly consumption. It is up and running in just 3 minutes.

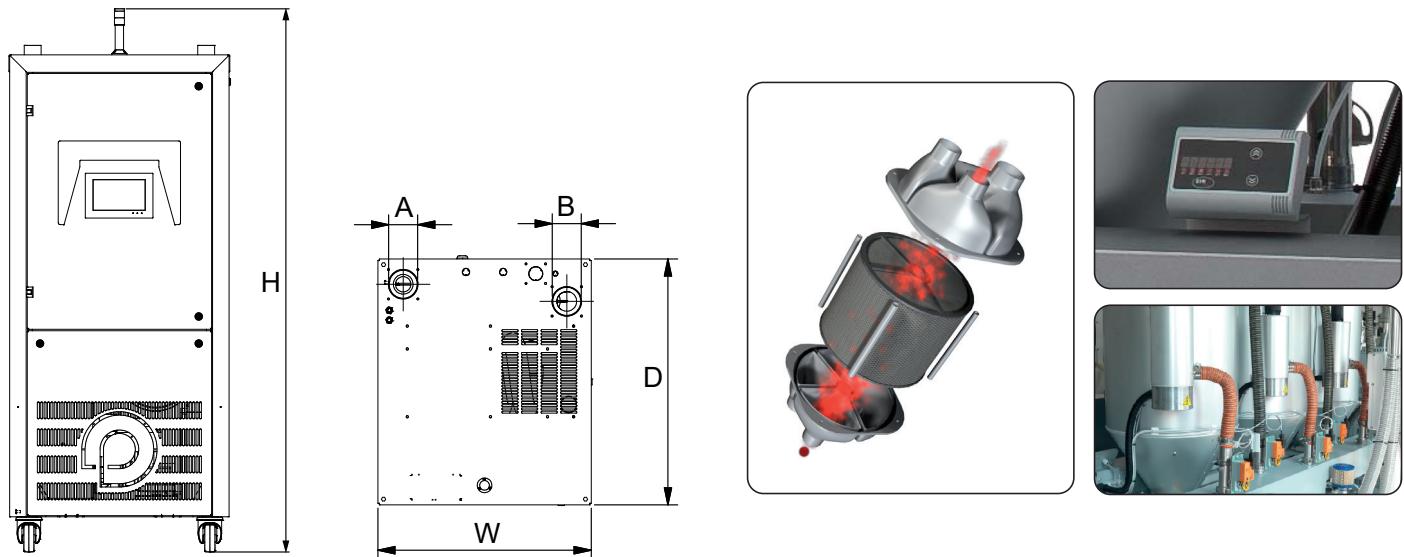

Does not require water or compressed air.

• AIR FLOW MANAGEMENT (AFM)

Does not release dust, ideal for the medical and optical fields.

• MULTI-HOPPER DRYING

Ready for multi-hopper drying (with up to 8 hoppers).

Technical data

	Unit of measure	DW120	DW200	DW250	
Air flow rate	m ³ /h	40÷120	70÷200	80÷250	
Process temperature	°C	60	60	60	
Dew point	°C	-25 ÷ -50	-25 ÷ -50	-25 ÷ -50	
Process blower power	kW	0,85	1,3	1,5
